

CivicOS Institute — Foundation Funder Prospectus

Organization: CivicOS Institute

Location: West Palm Beach, Florida

Primary Contact: Nicholas A. Cerbone, Director

Email: NCerbone@civicos-institute.org

Website: civicos-institute.org

1) Executive Summary

CivicOS Institute is a mission-driven civic innovation organization building practical pathways for local participation, community problem-solving, and public-interest capacity building. We serve communities in West Palm Beach and broader Florida contexts through structured civic engagement programs, operational support tools, and measurable implementation frameworks.

We are seeking foundation partnerships to scale place-based civic outcomes through a model that is locally grounded, operationally disciplined, and measurable over quarterly reporting cycles.

2) Problem Context

Communities face a persistent participation gap: residents care about local issues but lack clear, supported pathways to take sustained civic action. Grassroots groups and small organizations frequently encounter capacity constraints that limit execution, continuity, and measurable outcomes.

This creates a cycle of high intent but low implementation capacity.

3) CivicOS Solution Model

CivicOS addresses this gap through three integrated components:

- 1. Civic Participation Activation**
Structured engagement opportunities that convert interest into action.
 - 2. Community Capacity Infrastructure**
Practical workflows, templates, and coordination systems that help local initiatives execute consistently.
 - 3. Measurement and Learning Loop**
KPI-based tracking, quarterly reporting, and iterative program improvement.
-

4) Program Focus (12-Month Window)

- Resident engagement pathways in West Palm Beach and surrounding communities
 - Support for community-led projects requiring operational scaffolding
 - Partner network activation across nonprofit, civic, and local stakeholder groups
 - Documentation of outcomes and replicable implementation practices
-

5) Outcomes and KPIs

12-month targets (baseline planning): - 300+ residents reached through CivicOS-supported activities - 120+ active participants in structured civic sessions/actions - 12+ community initiatives supported with operational tooling/facilitation - 8+ partner organizations engaged in delivery/collaboration - 50+ documented civic actions completed - Quarterly reporting delivered on schedule (4/4)

6) Foundation Alignment Areas

CivicOS is best aligned with foundations prioritizing: - Civic engagement and local participation - Community capacity building - Equity and access to civic opportunity - Systems-level implementation support - Measurable outcomes and accountable reporting

7) Funding Opportunity Structure

We are currently seeking: - **General operating and capacity-building support** to stabilize and scale execution - **Program-specific support** for local civic participation initiatives - **Multi-year partnership pathways** tied to KPI progression and implementation milestones

Indicative request ranges: - Early-stage local implementation: \$10,000–\$50,000 - Program expansion and partner scaling: \$50,000–\$150,000 - Multi-year systems build-out: custom scoped with funder

8) Use of Funds

Foundation support is applied to: - Program delivery and facilitation - Community outreach and participant activation - Operational infrastructure and implementation tooling - Data collection, evaluation, and quarterly reporting - Core administration required for accountable delivery

9) Risk Management and Accountability

CivicOS uses a disciplined governance and reporting posture: - Defined authority and approval pathways - Documentation and retention controls - KPI-based performance tracking - Quarterly performance reviews with corrective-action loop

10) Why CivicOS / Why Now

CivicOS sits at the intersection of civic participation demand and local implementation need. Foundation investment at this stage enables high-leverage community outcomes while establishing a repeatable model for durable civic capacity.

11) Partnership Next Steps

We welcome: - Eligibility and fit discussions - Program officer exploratory calls - LOI and invited proposal pathways - Co-design on outcomes and reporting expectations
